🔗 Portfolio: valencosilva.github.io/Portfolio

PROFESSIONAL PROFILE

Junior Software Developer with practical experience in C#, C++, Java, Unity and Unreal Engine. Strong foundation in Object-Oriented Programming, Data Structures, Algorithms and Software Engineering principles.

Completed approximately 95% of a Bachelor's Degree in Game Development at Full Sail University (USA), developing strong technical skills in software development, analytical thinking and problem solving.

Developed projects involving Artificial Intelligence, Pathfinding Algorithms, Procedural Generation, User Interfaces and System Development. Experience working with Git/GitHub, collaborative development environments and technical documentation.

Currently expanding technical expertise through EBAC's Unreal Engine Development Program, focusing on C++, Software Architecture, Artificial Intelligence, Version Control and modern development practices.

Seeking an opportunity to contribute, learn and grow within a technology-driven organization.

HIGHLIGHTS

- 95% of Bachelor's Degree completed at Full Sail University (USA)
- Advanced English communication skills
- First Place – Robocode Artificial Intelligence Competition
- Experience with C#, C++, Java and SQL
- Experience with Git and GitHub version control
- Active portfolio with academic and personal projects
- Strong analytical and problem-solving skills

TECHNICAL SKILLS

Programming Languages

C#

C++

Java

SQL

Development Tools

Git

GitHub

Visual Studio

Visual Studio Code

Jira

Trello

MySQL

Software Development

Object-Oriented Programming (OOP)

Data Structures

Algorithms

Software Engineering Fundamentals

Debugging

Code Review

Problem Solving

Version Control

Additional Technologies

Unreal Engine 5

Unity

Blueprints

Artificial Intelligence

UI/HUD Development

Procedural Generation

Niagara VFX

PROJECTS

PROCEDURAL MAZE GENERATOR

Personal Project

- Developed a configurable procedural maze generation system.
- Implemented and compared pathfinding algorithms including A*, BFS and DFS.
- Created visualization and debugging tools for algorithm analysis.
- Developed runtime configuration interfaces for testing and validation.

Technologies: C#, Unity, Algorithms, Artificial Intelligence

ROBocode AI BATTLE BOT

Competition Project

🏆 First Place – Artificial Intelligence Competition

- Developed an autonomous robot using artificial intelligence techniques.
- Implemented predictive targeting and adaptive decision-making logic.
- Applied mathematical reasoning and algorithm optimization.

Technologies: Java, Artificial Intelligence, Robocode

TIC TAC TOE 3D

Team Project

- Developed gameplay and business rule logic.
- Implemented score tracking and state management systems.
- Created user interface components and gameplay feedback mechanisms.
- Collaborated using Git/GitHub workflows and code reviews.

Technologies: C#, Unity, Git, GitHub

FALL'N BLOCKS

Academic Team Project

- Developed level progression and score management systems.
- Participated in architecture implementation using C++ and ECS concepts.
- Worked in a collaborative team environment using agile practices.

Technologies: C++, Vulkan, ECS, GitHub

EDUCATION

CRUZEIRO DO SUL UNIVERSITY (BRAZIL)

Associate Degree in Systems Analysis and Development (In Progress)

August 2026 – Expected December 2028

Relevant Coursework:

- Algorithms and Computational Thinking
- Database Modeling
- Front-End Web Development
- Software Development
- Systems Analysis
- Data Structures
- Object-Oriented Programming

EDUCATION

FULL SAIL UNIVERSITY (USA)

Bachelor's Degree Studies in Game Development (95% Completed)

May 2024 – February 2026

Relevant Coursework:

- Software Engineering
- Data Structures
- Object-Oriented Programming
- Computer Graphics
- C++
- Mathematics
- Systems Development
- Unity Development
- Unreal Engine Development

Completed approximately 95% of the degree program.

Program interrupted three months before graduation due to financial circumstances.

EBAC – ESCOLA BRITÂNICA DE ARTES CRIATIVAS E TECNOLOGIA

Professional Certificate in Unreal Engine Development

2026 – Present

Topics Covered:

- C++
- Unreal Engine 5
- Blueprints
- Gameplay Systems
- Artificial Intelligence
- UI/HUD Development
- Level Design
- Debugging
- Version Control (Git)
- Niagara VFX

LANGUAGES

Portuguese

Native

English

Advanced

Spanish

Intermediate

SOFT SKILLS

- Team Collaboration
- Communication
- Adaptability
- Continuous Learning
- Analytical Thinking
- Problem Solving
- Organization
- Time Management

ADDITIONAL INFORMATION

- Available for Internship, Trainee and Junior-Level Opportunities.
- Strong interest in Software Development, Systems Integration and Technology Solutions.
- Experience working on collaborative academic and personal development projects.
- Active GitHub portfolio demonstrating practical programming experience.
